7. Febr.	Shroue sunday.	10. Febr.
10. Febr.	Ashwednesday.	13. Febr.
28. March.	Easter day.	31. March.
2. May.	Rogation sunday.	5. May.
6. May.	Ascention day.	9. May.
16. May.	Whitsunday.	19. May.
28. Nou.	Aduent sunday	1. Decemb.

To know what your daily expences commeth vnto in the whole yeare, very readily, without a Table.

Suppose you spend fiue pence a day, & would know what it amounteth vnto in the whole yeare, (say thus:) fiue pence the day, is fiue pound, fiue halfe pounds, and fiue groats, which being set together, maketh nine pound two shillings. Againe, seauen pence the day, is seauen pound, seauen halfe pounds, & seauen groats in the yeare, which set together, maketh tenne pounds, twelue shillings and foure pence: thus may you doe the like of any other summe.

The Anatomy of mans body, as the parts thereof are gouerned by the xij. Signes of the Zodiaque.

Aries head and face.

Taurus neck & throat.

Gemini armes & shoulders.

Cancer brest stomach & ribs.

Leo heart & backe.

Virgo bowels & belly.

Libra reins & loynes.

Scorpio secret membres

Sagitarius thighs.

Capricornus knees.

Aquarius legges.

Pisces the feete.

♈ Aries ♉ Taurus ♊ Gemini ♋ Cancer ♌ Leo ♍ Virgo ♎ Libra ♏ Scorpio ♐ Sagitarius ♑ Capricornus ♒ Aquarius ♓ Pisces.

If thou be sicke and health wouldst haue,
the councell of the learned craue:
If thou haue health, to keepe thee so,
flye Idlenesse, a deadly foe.

Friend. 1619.

A Prognostication

In which yon may behold the state of this yeere of our Lord *God.* 1619.

Being the third after the Leape yeere.

By GABRIEL FRIEND.

Psal. 19. 2, 3.

One day telleth another, and one night certifieth another.

But there is neither speech nor language, yet their voyces are heard among them.

Imprinted at London for the Company of Stationers. 1619.

A neceſſarie and perfect Rule, to know the beginning and ending of euery Tearme, *with their Returnes.*

Hillary Tearme beginneth the xviij. of Ianuarie, (if it be no Sunday) which ſo being, it is then deferred vntill the next day following: And endeth the xij. of Februarie, which Tearme hath foure Returnes, viz

1. Octabis Hillarie.
2. Quind. Hillarie
3. Craſti Purifica
4. Octabis Purifica.

Eaſter Tearme beginneth xviij. dayes after Eaſter, and endeth the next Monday after Aſcention day: and hath fiue Returnes; that is to ſay,

1. Quind. Paſchæ
2. Tres Paſchæ.
3 Menſe Paſchæ.
4. Quinq; Paſchæ
5. Craſti. Aſcention

Trinitie Terme beginneth on the Friday next after Trinitie Sunday: and endeth the Wedne day fourtnight after: and hath foure Returnes; that is to ſay,

1. Craſtin. Trinitatis.
2. Octabis Trinitatis.
3 Quind. Trinitatis.
4 Tres Trinitatis.

Michaelmas Tearme beginneth the ninth day of October, (if it be not Sunday) and endeth the xxvij. of Nouember: and hath eight Returnes; viz.

1. Octabis Michael.
2. Quind. Michael.
3. Tres Michael.
4. Menſe Michael.
5. Craſt. Animarum.
6. Craſtino Martini.
7. Octabis Martini.
8. Quind. Martini.

Note alſo that the Exchequer openeth eight dayes before any terme begin (except Trinitie Tearme;) in which it openeth but foure dayes before.

A Deſcription of the foure quarters of the Yeere, and the diſpoſition of the ſame.

Of Winter.

The ☉ Sunne in ♑ Capricorne ♒ Aquarius ♓ Piſces.

In ſtead of flowers and graſſe ſo greene,
The Earth hath got another hue;
Froſts, Snow, and durtie dales are ſeene,
Where pleaſant Plants moſt fruitfull grew.
Childhood, cold Rhewmes, and Flegmaticke ſtate,
Of Winters cold nature doth beſt relate.

WInter the greateſt oppoſite to Summer according to our vſuall computation begunne to take his place on the 12 day of December 1618 at the firſt entrance of the Sunne into the firſt minute of the Signe Capricorne, making the Winter Solſtitium in this our Northy latitude, that is, the ſhorteſt day and longeſt night: for then is the Sunne fartheſt remooued from our Zenith, or Verticall point. This froſt-bitten Churle meaneth to abide with vs till the tenth day of March next following.

This Winters ſeaſon being of naturall diſpoſition cold and moiſt, according to the iudgemene of all the learned, is not likely much to alter his accuſtomed condition. How the ſappe leaueth the branches of trees and hoartes, and deſcendeth downe into the

rootes: and naturall heate also forsaketh the exteriour parts, and possesseth the inward parts: therefore the iudiciall say, that the rootes of plants and hearbes haue the best operation in physicall vses.

The diseases incident to this Quarter, are, toothache, and phlegmaticke Feuers, coughes, crampes, stitches, and other distemperatures answerable to the condition of the season:

Wherefore for to preuent such griefes,
Vse meates thats warme and drie:
Both head and feet see warme thou keepe,
Eate much, drinke sparingly.

Of the Spring.

The ☉ Sunne in ♈ Aries, ♉ Taurus, ♊ Gemini.

Most welcome is the fruitfull Spring
To creatures all that multiply,
Both birds and beasts doe skip and sing,
In flocking sort abundantly.
In sanguine men and youthfull yeeres,
This Seasons nature best appeeres.

The Sun hauing fully finished the Winter quarter in the last minute of Pisces, taketh his springall beginning at his entrance into the Ram-headed Signe Aries, making the artificiall day and the night equall: for the Sunne riseth at 6. of the clocke in the morning, and setteth at 6. in the euening, and so taketh his farewell to the Spring quarter in the last scruple of Gemini.

By naturall inclination this Quarter is warme and moist, resembling the ayre and youth of man, tem-

temperate and wholesome, and therefore Hypocrates and other learned Physicians both ancient and moderne, doe hold it to bee the chiefest time in all the yeere to take physicke, and to giue ease to such that be diseased: and not onely to such that feare diseases to breed in them by the distemperature they feele in their bodie, but also to others that haue had long and lingring diseases: but I would wish them not to trust to quacksaluing Mountibankes, or vnskilfull Practitioners, that bring many to ruine, and all through want of true iudgement.

The Maladies attending on this Quarter, according to the opinion of many, are these: faintings, fluxes of blood, frenzies, impostumes, sore eyes, tooth ache, small pox, ringwormes, lunacie, giddinesse in the head, paines in many parts of the body, faintings, and the like:

Fresh humors now abound man in,
To bleed and purge spare not thy wealth:
Let meates be pure, and meales but thin,
If thou regard thy future health.

Summer Quarter.

(The ☉ Sunne in ♋ Cancer, ♌ Leo, ♍ Virgo.

Bright Sol hauing got his highest grade,
Lookes downe on earth with hote aspect,
Parching the grasse and cornie blade,
Ripening all things with good effect:
Fierce cholericke men, and middle age,
Of Summers nature do presage.

The glittering Sunne finishing his course in the last scruple of the last Spring Signe Gemini, passeth orderly into the first grade of the Summer solsticall crabbed Signe Cancer, at which time is the longest day and shortest night in the yeere: after this day, the dayes grow shorter, and nights longer, vntill such time as the night comes to be as long as the day now is, which will be at the progression of the Sun into the opposite solsticall Signe Capricornus. This Quarter endeth on the 13 day of September at the Sunnes entrance into Libra.

The disposition of this Quarter is hot and drie resembling fire: mans stomacke now is slowest of digestion, and because naturall heate leaueth the inward parts, and possesseth the outward, eate and drinke moderately therefore lest you surfet, and so bring your selfe into dangerous diseases, such as these and the like: hote burning agues, yellow Iandies, griping paines, pleurisies, lasher, vnquietnes of minde, sorrow, apostumes, obstructions in the liuer, vomittings, head ache, purse ache, which is likely to proone the heart ache, or consumption.

Mans stomacke now more weaker is,
Then earst it was before:
To gormandize it is not good,
Take heed, t'will make thee poore.

Autumne, or Harueſt.

The Sunne in Libra, Scorpio, Sagittarius.

For good husbands paine Harueſt yeelds gaine,
Whatsoeuer now on earth doeth grow:
Each tree, plant, shrub, all for mans good,
Shew them their dutie God vnto.

Crooked

Crooked old age, humour, melancholy,
Will Autumnes nature truely verifie.

THe laſt Quarter of our common yeere called Autumne, Harueſt, or the fall of the leafe, being contrary to the good Spring, the comforter of all creatures: for it is the moſt diſtemperate and dangerous ſeaſon in the whole yeere: and taketh his beginning when the Sunne hath got poſſeſſion in the firſt degree of Libra: about which time the day and night are come againe to one equall length, as in the Spring. This ſickly Quarter will not leaue vs till the Sunne hath paſſed thorow the three autumnall Signes, and entreth the firſt grade of Capricorne, which will be about the twelfth day of December.

The condition of this ſeaſon according to naturall inclination is cold and dry, fitly compared to the earth, or northerne Region, or melancholy humour, being the vnwholſomeſt quarter in the yeere, a rearmed vp Hypocrates, the mother and nurſe of all deadly diſeaſes: the face of the earth loſeth now her beauty: plants and trees caſt their flowers and fruits, beaſts betake themſelues to their dennes, ſerpents to their caues, clouds are now at the higheſt, and Springs at the loweſt.

But to ſhew the griefes that we are ſubiect to this ſickly ſeaſon, are many and dangerous, and chiefly theſe paines in the backe, quartane agues, ſtrangurie, conſumptions, windineſſe in the ſtomacke, fluxes of blood, dropſie, conſuming agues, coughes, Sciatica, lameneſſe in the ioynts, botches, cankers, melancholy paſſions, fiſtulaes, ſtoppings of winde, ſwelling and hardneſſe of the ſpleene, vnaccuſtomed feauers and ſuch like.

If ſtranger ſickneſſe come vnto vs,
Its Gods doing from ſinne to wooe vs:

A Prognostication.

Take heed I say of cold raw fruite,
Whose iuyce corruptions breed:
This season serueth fit againe,
To purge, to bathe, to bleed.

The rising and setting of the Sunne, the length of the day and night, the rising and setting of the Planets, as also the disposition of the weather for euery quarter of the Moone throughout the yeere, with notes of husbandry for euery moneth in the yeere.

Ianuarie.

The 4 day the Sunne riseth at 8 of the clocke, and setteth at 4, the day is 8 houres, the night 16 houres.

The 15 day the Sunne riseth a quarter before 8. and setteth a quarter after 4. The day is 8 hours and an halfe, the night 15 houres and an halfe.

The 24 day the Sunne riseth halfe an houre before 8, and setteth halfe an hower after 4. The day is 9 houres, the night 15 houres.

Saturne is neere Southwest at Sunne rising
Iupiter and Venus in the East a quarter before Sunne rising.
Mars is south at Sun-set.
Mercury riseth a little before the Sunne.

New Moone on Tuesday the 5 day, halfe an houre after 6 a clocke at night, inclined to colde and frostie weather.

First

First quarter on Wednesday the 13 day a little after 5 in the morning, temperate weather.

Full Moone on Tuesday the 19 day at 10 at night cloudie weather.

Last quarter on Wednesday the 27 day, 44 minutes after 11 a clocke at noone, moist weather.

That timber that you would not haue to chinke or rue, cut downe now: stub and root your meddowes and crumble ground, and it will not grow againe: Digge your gardens, remoove your Bees, vn-wry the rootes of your fruit-bearing trees, especially those that bee aged and barren: Make ready your Plough tackling: fallow your Land for wheat and rie: Riue vp your liue ground for Oates, that it may be seasoned and mellow.

February.

The first day the Sunne riseth a quarter after 7, and setteth a quarter before 7. The day is tenne houres and a halfe, the night 13 and a halfe.

The 9 day Sunne riseth at 7, and setteth at 5. The day is 10 houres, the night 14 houres.

The 16 day Sunne riseth a quarter before 7, and setteth a quarter after 5. The day is 10 houres and an halfe, the night 13 and a halfe.

The 24 day the Sunne riseth halfe an houre before 7. and setteth halfe an houre after fiue, the day is 11 houres, the night 13 houres.

Saturne is South at Sun-rising.
Iupiter and Venus rise a little before the Sunne.
Mars is South west at Sun set.
Mercury sets a little after Sunne.

New Moone on Thursday the fourth day neere high noone, blustring and wet.

First

First quarter on thursday the 11 day, 37 minutes after high noone, boisterous winds.

Full moone on thursday the 18 day at 11 at noone, winter-like weather.

Last quarter on Friday the 26 day a quarter after 8 in the morning, faire weather.

Cut and prune your fruite trees, pull off the mosse and other nap ome outgrowings, lay your Quicksets, plant Roses: cut, lop, plash, and twist your Hedges at the last quarter of the Moone: Graft and set trees, Slips, Branches: and bare knots at the full of the Moone at night, Riue vp your layed land; and sow Beanes, Pease, and Oates in drie ground, in the new of the Moone: but in watry and moyst ground, after the full Moone, or within foure daies before or after the same.

March.

The fourth day Sunne riseth a quarter after 6, and setteth a quarter before 4. The day is 11 houres and a halfe, the night 12 and a halfe.

The 11 day the Sun riseth at fiue, and setteth at 6. The day and night equall.

The 18 day Sunne riseth a quarter before 6, and setteth a quarter after 6. The day is twelue houres and a halfe, the night 11 houres and a halfe.

Saturne creepeth towards South at Sun rise.

Iupiter, Venus, and Mercury set after Sun.

Mars is in the East at Sun-set.

New Moone on Friday the 5 day 50 minutes after 12 at night, wet weather.

First quarter on Friday, the 12 day 20 minutes after 7 at night, windie weather.

Full Moone on Saturday the 20 day halfe an houre after 1 in the morning, blustring weather.

Last

Laſt Quarter on Sunday the 28 day half an houre after 3 in the morning, ſitting the ſeaſon.

Sow Beanes, Peaſe, Oates in the beginning: Graffe & plant fruit trees, and eſpecially in the end of March. Set Gourds, & Sage: couer the Rootes of your trees that were bared in Ianuary with kindly earth at the full of the Moone, and ſlit cleaue the Roots & driue in wedges, & boare holes through the Trees, and ſtop the ſame againe with Pinnes: all which be meanes to make them beare the better. Plough & labour your Barly land. Carry your Midden to the field, and chiefly in the laſt quarter of the Moone, then it will not dry away.

Aprill.

The 2 day Sunne riſeth a quarter after 5, and ſetteth a quarter before 7. The day is 13 houres and a halfe, the night 10 and a halfe.

The 11 day the Sun riſeth at 5, and ſetteth at 7. The day is 14 howers, the night 10.

The 19 day it riſeth a quarter before 5, and ſetteth a quarter after 7. The day is 14 howers and a halfe, the night 9 and a halfe.

The 27 day the Sunne riſeth halfe an howre before 5, and ſetteth halfe an howre after 7. The day is 15 howers, the night 9.

Saturne riſeth before the Sunne.

Iupiter & Venus neere the Weſt at Sun ſet.

Mars neare the weſt at Sunne riſe.

Mercury vnder the Sunne beames.

New Moone on Sunday the 4 day half an houre after a 11 at noone, temperate weather.

Firſt quarter on Sunday the 11 day, 27 min. after 2 in the morning ſpringing weather.

Full Moone on Sunday the 18 day, 43 min. after 4 in the euening, much raine.

Laſt quarter on Munday the 26 day a little after 8 at night, windy and wet.

Sow

Sow Barley in strong land: and in the South of England, sow Hemp and Flax, and part of your Garden seeds, as Gourds, Cucumbers, Mellons: and set your Garden hearbs about the end of Aprill.

May.

The 7 day the Sunne riseth a quarter after 4 and setteth a quarter before 8, the day 15 houres and a halfe, the night 8 and a halfe.

The 18 day it riseth at 4, and setteth at 8, the day 16 houres, the night 8.

Saturne & Mercury prepare the way for the Sunne.

Iupiter and Venus southwest at Sun set.

Mars southwest at Sun rise.

New Moone on Munday 3 day at 8 a clocke at night faire and temperate.

First quarter on Munday the 10 day 56 min after 10 in the morning faire weather.

Full Moone on Tuesday the 18 day 21 min. after 8 in the morning fitting the season.

Last quarter on Tuesday the 25 day 45 min. at 9. in the morning some showers.

Sow Barly in the beginning, specially Yorkshire: set Gourds, Cucumbers, and Mellons: sow Leeks, Onions, Purslaine, Coriander, Smalage, & Basill, then stir your land the first stirring for wheat & Rie.

Iune.

The 8 day the Sun riseth a quarter before 4, and setteth a quarter after 8, the day 16 howers and a halfe, the night 7 and a halfe.

The 14 day of this moneth the daies be at the longest, from which time untill the 8 day of the next moneth they shorten halfe an houre.

Saturne and Mercurie set after the Sunne.

Iupiter is South at Sun set.

Mars

Mars South at Sun riſing.
Venus in the Weſt at Sun ſet.

New Moone on Wedneſday the 2 day 22 minutes after three in the morning ſummer weather.

Firſt quarter on Tueſday the 8 day 43 min. after 9 at night ouercaſt.

Full Moone on Wedneſday the 16 day 26 minutes after 11 at night ſulphurie hot.

Laſt quarter on Thurſday the 24 day at 8 at night faire weather.

Carry forth your Doung to cheriſh your Wheate and Rie lands, bring home your Fuel, ſet Leekes at the end of the Moneth, and ſow tender heard ſeeds, mow downe your low medowes lying neere the water ſides.

Of Iuly.

The 8 day Sun riſeth at 4, and ſetteth at 8: the day is 16 howers, the night 8.

The 19 day it riſeth a quarter after 4, and ſetteth a quarter before 8: the day is 15 howers and a half, the night 8 and an halfe.

The 28 it riſeth halfe an howre after 4, and ſetteth halfe an houre after 7: the day is 15 howers, the night 9.

Saturne, Venus and Mercurie march on a row in the Weſt at Sunne ſet.
Iupiter is neere South at Sun ſetting.
Mars is neere the South at Sun riſing.

New Moone on Thurſday, the firſt day 27. min. after x. of the cloeke in the morning, ſome ſhowers.

Firſt Quarter on Thurſday, the 8. day, 57. min. after x. of the cloeke in the morning, coole weather.

Full Moone on Friday, the xvj. day, 18. min. after ij. of the clock: in the afternoone, cloud.e.

Laſt

Last quarter on Saturday the 24 day 39 min. after 3. in the morning, sommer weather.

New Moone on Friday the 30 day 24 min. after 6 at night hote and sulphurie.

Cut downe your high Meddowes, & much of your other Grounds, the continuance of faire weather is doubtfull: follow the old Proverbe, Make Hay while Sunne shineth: make emplastration for Rootes, lay naked knots in Fruittrees: and about the end, put sickle into part of your hard corne.

August.

The 6 day Sun riseth a quarter before 5, and setteth a quarter after 7. The day is 14 howers and a halfe, the night 9 and a half.

The 14 day it riseth at 5, and setteth at 7. The day is 14 houres, the night 10.

The 22 it riseth a quarter after 5. and setteth a quarter before 7. The day is 13 houres and a halfe, the night 10 and a halfe.

The 30 day it riseth halfe an houre after 5, and setteth halfe an houre after 6. The day is 13 houres, the night 11.

Saturne is South at Sun set.

Times

Times prohibited for Marriage.

From { After Aduent Sunday. / after Septuagesima. / three dayes before the Ascention. } vntill { 8 daies after the Epiphanie. / 8. dayes after Easter. / Trinity sunday }

Ordinary signes and tokens of Raine.

The falling of soote from the chimney, the crying of Crowes, Bells hearte further then they are wont to be, Swallowes flying neere the water, the flying of Gnats before mens eyes, the extraordinary crying and crowing of Peacocks, Cattell eating greedily, or licke their hooues, moysture of stones in a Wall, the extraordinary biting of fleas, the croking of frogs in the morning, wind frō the west or south, the moystnes of salt: Thunder at noone, and the like.

Signes of faire weather.

The cleere Rising and setting of the Sunne with out clowds, the appearing of a white circle about the moon, the flying of Bats in the euening, a misty morning in Summer, easterly wind, the laying of Dawes in the morning: a red Skye in the euening sheweth it will be faire the next day, and many such like.

Of the longitude & latitude of *England*.

(34866.

Thus much in miles whole *England* it containes,
Thus much in miles will reach about it rouñd, 1890
Her length frō Lizard point to Barwick straits, 334.

Twixt Douer & Holy-head, he breadth is found 150
Amongst good neighbours thus doth *England* stand,
Lord bleſſe her *Prince* and people with thy hand,

Short Rules neceſſary to be obſerued in Letting of Blood, of Purging, Bathing, and Sweating.

BLood not at all, except cauſe compell thee, which is to be knowne by the counſell of the Learned Phyſition: the age of the Patient ought alſo to be regarded: for from very young, or olde perſons Blood ought not in any caſe to be taken.

The time of the yeare fitteſt for this purpoſe, is, from the middeſt of the Spring, to the beginning of the Summer-Quarter: Haruеſt is alſo indifferent, the ſeaſon being temperate.

For Complexion, let bloud the Chollericke, when the Moone is in Cancer, Scorpio, or Pisces, in any place except the Breſt, Members, or Feete.

For the Phlegmaticke, the Moone in Aries or Sagittarius, in any place except the Head & the Thighs.

For the Melancholy, the moone in Libra or Aquarius, in any place, the Buttocks and Legs excepted.

And for the Sanguine complexion, let bloud in any of the former ſignes: ſo that it be done with conſideration and aduiſe of the ſkilfull.

Take heede further, that yee let not Bloud in the extreame heate of Summer, or cold of Winter, vnleſs the Patient be taken with the Pluriſie, Peſtilence, Frenzie, Squinancie, or Apoplexie, or the like extreame diſeaſes; for then ye may not ſtay for a choſe day, leaſt in meane time the party diſeaſed be paſt help

After

After Blood letting, abſtaine from ſleepe and food, for the ſpace of fiue houres: alſo from all other exerciſes that ſhall too much ſtraine the bodie, for foure dayes after, vſing meates of a light digeſtion.

Of Purging.

IT is very good to Purge when the Moone is in Cancer, Scorpio, or Piſces, and indifferent vpon extremity, in Gemini, Libra, or Aquarius.

Purge not when the Moone is in any of theſe Signes, Aries, Taurus, or Capricornus.

Of Bathing.

THe fitteſt time in the yeare to enter Bathes, is frō the beginning of May vnto the end of September, when the Moone is in any of theſe Signes, Aries, Leo, or Sagittarius, two or three dayes after the change of the Moone, or at the full.

Let the Sunne be of a good height when you enter into the Bath: for then the muſtie and other corrupt infections, are drawne vp from the Earth.

If you will Bathe for cleanlyneſſe, let the Moone haue her courſe in Libra, or Piſces.

Bath not when the Moone is in theſe cold ſignes Taurus, Virgo, or Capricorne.

Of Sweating.

FOr Sweating, let the Moone be in theſe ſignes Aries, Leo, Sagittarie, Cancer, Scorpio, Piſces.

Note further that it is better to Sweate in the Euening, then in the Morning.

Of the difference of Yeares.

ACcording to the account of Hystoriographers, the Yeare beginneth the 12. day of Ianuary, containing 365. dayes and 6. houres, which sixe houres accounted to every fourth Yeare, maketh one whole Day, which day is put to 25. of Februarie, making Bissextile, or Leape-yeare: in which Yeare, Februarie hath 29. dayes. The Gregorian yeare of forraine Nations hath the same account: but they begin their yeare ten dayes before vs; that is to say, the 22. of December. (March.

The Church of *England* begin the yeare, the 25. of

The *Egiptian.* beginnes the 19. day of Iulie, containing 365. dayes, having 12. Moneths, each Moneth containing 30. dayes, accounting the 5. odde dayes betweene each Yeare.

The most people of *Asia*, beginne their Yeare the 13. day of December.

The equall *Tropicall* Yeare, beginneth the 10. day of March, containing 365. dayes, 5. houres and 49. minutes 15 seconds.

The Syderal or starry yeare, beginneth the 8. Aprill, containing 365. dayes, 6. hours 9. min: 39. seconds.

The yeare for the Dominicall Letter and Prime, beginneth the 1. day of Ianuary, and for the Epact the 1. day of March. (March.

The yeare of his Maiesties Reigne, is the 24. of

Of Moneths.

The Moneth Solar is that space of time whilest the Sunne remaineth in one Signe.

The vsuall moneth is sometimes 30. and sometimes 31. dayes.

The

The Moneth of Paragration is 27. dayes and 8. houres, the Reuolution of the Moone through the 12. Signes.

The Moneth of Aparition is 28. dayes.

The Moneth of Conſecution is, from Change to Change.

The moneth Medicinall, 29. dayes, 12. houres.

Of the foure Quarters of the yeare compared with the nature of the foure Elements, Ages, Regions, or Quarters of the Heauen: Alſo with the foure principall Windes and Qualities.
